Digital Workshop - Powerfuels in North America
The importance of a Standard

- **Pascale Lepage**
Business Development Advisor
May 5, 2021

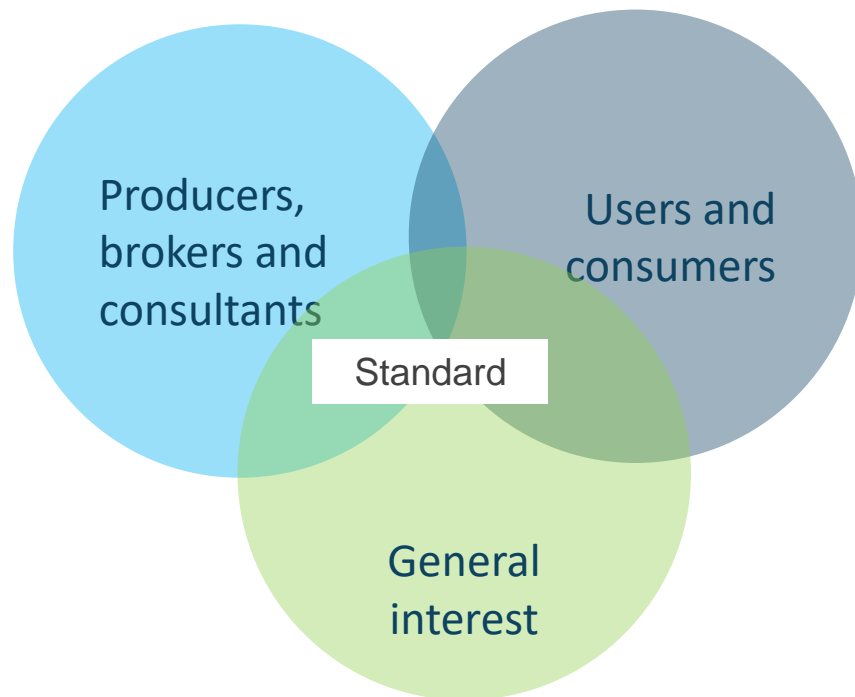

STANDARDS

The basis

- Specify the requirements that a product, a service, a process or a system must meet
- Developed by an accredited standard development organization
- Content is established by consensus
 - ✓ Well-balanced committee
 - ✓ Representative of stakeholders
- Mandatory VS voluntary standards
- May serve as a reference document for conformity assessment activities

Consensus Standardization

Technical Committee for Standardization

- Representativeness
- Balanced
- Expertise
- Transparency
- Independence
- Consensus

New Project

National Standard on Green Hydrogen on Traceability

- ✓ Standard project that will measure the environmental impact of the energy source and the hydrogen production process.
- ✓ Canadian standard
- ✓ Current status: Funding
- ✓ Significant opportunity for producers and users of hydrogen due to the innovative nature of the project

THANK YOU!
